

Role Profile

Role Title: Quality Control Technician 1

Reports to: Global Quality Manager

Position Location: Windsor, Wi

Business Overview:

Genus is a global FTSE 250 company, headquartered in the UK and listed on the London Stock Exchange. With revenues of around £500 million, Genus has a presence in over 70 countries, with a global workforce of approximately 3,200 employees. One of the best performing stocks on the London Stock Exchange, the Company's market capitalization is around £2 billion. It is a worldwide leader in porcine and bovine animal genetics, partnering with farmers to transform how we nourish the world – a mission that is important to a sustainable future.

Each generation of animals is selected based on a number of desired traits, including greater health, fertility, productivity or feed efficiency. With superior animal genetics, Genus helps its customers in the dairy, beef and porcine supply chains around the world produce offspring with improved robustness, superior production efficiency and greater sustainability. Genus's vision of *"pioneering animal genetic improvement to help nourish the world"* is supported by its core values to be customer-centric, results-driven, pioneering, people-focused and responsible.

Genus IntelliGen™ Technologies is a unit of Genus PLC, a global pioneer in animal genetics. IntelliGen Technologies is the global brand behind the technology that develops sexed bovine genetics that helps customers maximize their profitability and reach their end goals in a fast and efficient manner.

Role Overview:

Quality technicians are responsible for conducting testing procedures after production to ensure products comply with quality standards. Quality Control Technicians are responsible for maintaining quality-assurance processes, testing products, and recording results. Reporting to a quality manager, quality control technicians follow through on set processes and ensure adherence to best production practices and product quality standards, as well as monitoring the efficiency and cost-effectiveness of processes.

Essential Duties and Responsibilities:

- Perform and support daily, weekly, and monthly quality control testing, inspections and procedures using four routine assays
- Record and update all documentation and results in a timely fashion for each assay in the appropriate format
- Update and maintain the Quality Control record logs and spreadsheets of necessary data
- Weekly maintenance of quality control equipment to ensure proper fabrication of IntelliGen product
- Report any quality errors or issues related to product information from R&D, production, or results to Quality Assurance
- Report results, issues and bottlenecks to the Quality Control Supervisor
- Comply with established quality, safety, and environmental procedures and policies

Requirements:

- Minimum Associate's Degree in related field or equivalent work experience required
- Background knowledge of cellular and molecular biology
- Experience in analyzing progressive motility of sperm cells
- Experience with plating samples for bacterial analysis
- Experience with manufacturing media and reagents to specification
- Strong attention to detail
- Excellent interpersonal and communication skills
- Basic computer skills and familiarity with Microsoft Office required
- DNA isolation and PCR experience a plus

Equal Employment Opportunities:

Genus is an equal opportunity employer. In accordance with anti-discrimination law, it is the purpose of this policy to effectuate these principles and mandates. Genus prohibits discrimination and harassment of any type and affords equal employment opportunities to employees and applicants without regard to race, color, religion, sex, sexual orientation, gender identity or expression, pregnancy, age, national origin, disability status, genetic information, protected veteran status, or any other characteristic protected by law. Genus conforms to the spirit as well as to the letter of all applicable laws and regulations.
